WORK EXPERIENCE

Competitive Programming Club, GUAPA
Organizer y Mentor

April 2019 - present
Mexico City

- Support and guide students interested in learning competitive programming, teach them basic through intermediate programming concepts and common algorithms in the field as well.

Sistemedic
Emergency Medical Technician

September 2018 - March 2020
Mexico City

- Lead a team of medical technicians, perform basic to advanced interventions through teamwork while interacting with healthcare personnel, patient's family and the general public while demonstrating the highest standards of care to patients.

PROJECTS

Full list of projects at my [website](#).

- [Telegram ChatBot](#) (Rust/PostgreSQL)
A bot that provides information about the people I volunteer with in an EMT organization. Uses the official Telegram API and runs on a Raspberry Pi.
- [Numerical Methods](#) (Python/Django/Heroku)
Web page where various numerical methods are explained and implemented with their respective graphical representations.
- [Git Implementation, \$\mu\$ Git](#) (Rust)
Basic implementation of the most common commands and features of the distributed version-control system, Git.
- [BrianF Compiler](#) (Rust)
A toy compiler that generates, assembles and links x86 assembly instructions with the help of GNU Binutils.
