

EDUCATION

Universidad Nacional Autónoma de México

August 2018 - June 2022

Bachelor of Science in Applied Mathematics and Computer Science Mexico City

WORK EXPERIENCE

Full Stack Developer - [Oracle \(Real Time Health Systems\)](#)

October 2023 - present

- Served as key contributor to a U.S. Department of Veterans Affairs task order project, expanding product capabilities with new features that **improved user experience**, while simultaneously modernizing the codebase from Java 8 to Java 17 and implementing robust testing practices for backend services.
- Identified, diagnosed, and implemented a fix for a Maven plugin bottleneck that resulted in a **99% reduction in runtime** that benefited both local development environments and CI/CD workflows across the entire organization.
- Improved developer productivity by implementing hot-reloading and mock request capabilities for our frontend code, **dramatically reducing feedback loop time by ~95%** in local builds.

Applications Developer - [Oracle \(Fusion Financials Receivables\)](#)

July 2022 - October 2023

- Diagnosed and resolved critical bugs in [Fusion Financials](#)' receivables module, preventing potential financial disruptions for enterprise clients. Combined deep code analysis with accounting domain knowledge to efficiently troubleshoot and fix complex issues resulting in enhanced system stability.
- Proposed and implemented alerting system that **significantly reduced response times** for P1 bugs, leading to increased customer satisfaction.

Junior Software Developer & Intern - [Auronix](#)

June 2021 - June 2022

- Identified and resolved a critical memory leak in backend services, resulting in an **80% reduction in server count**, then collaborated closely with the DevOps team to implement an auto-scaling, docker-based microservices architecture that further optimized infrastructure and significantly reduced cloud hosting costs.
- Led the complete rebuild of the Twitter API integration, creating a more **stable and reliable** offering.
- As an intern, **led** the implementation of a new communication channel (Slack) for the platform, expanding the company's product offerings.

PROJECTS AND CONTRIBUTIONS (Full list at my [website](#))

- [ZofIA, Learning Platform](#) (Rust/React)

An educational platform geared towards assisting students in their preparation for the admission exam at the most prestigious public university in Mexico. Grew by [20k Instagram](#) followers in first month after launch. At its peak had ~1k daily users and currently we have ~2k registered users.

- [Lux, A Programming Language](#) (Rust)

An implementation of a fully featured dynamically typed language and its interpreter, with a particular focus on error messages. Try the [wasm](#) repl [here](#).

TECHNOLOGIES

- **Programming** (Years of experience)
Python(5), Rust(5), JavaScript/TypeScript(4),
Java(3), Go(2)
- **Others**
Linux, SQL (Oracle, MySQL, PostgreSQL), Docker,
Git, Redis, React, JUnit, Jest, Selenium, JFR/JMC

AWARDS

- 7° place, ACM-ICPC Masters México 2023
- 1° place, Google @ UNAM 2021
- 8° place, Facebook Spanish Hack 2021 (Latin America)
- [3° place](#), 15° National Programming Contest ANIEI
- [Top 5%](#), ACM-ICPC Grand Prize of Mexico 2020
